

Klepper Pacific Action Sails.

Take away your conventional mast and boom and you have the Pacific Action sail system.

No mast, no boom, no halyards.
Simplicity in itself and very forgiving.

With three sizes to choose from these uniquely designed sails take full advantage of the fact that wind speed increases as the distance from the water surface increases.

Pacific Action sails have established a formidable reputation with expeditions and adventure racing world-wide, are great for touring and a breeze to use. They have also proven themselves in long-haul expeditions from the North Pole to South America, and in trans-ocean crossings.

Pacific Action sails are stable, reliable and easy to use. To raise the sail, unwrap the sail from around the twin masts and release. The shock cord pulls the sail up, and the patented mast-step cam system maintains the optimum sail shape.

- Attaches easily to your Klepper with the Kwik adapter. Only one hand-tighten fastener.
- Sail upwind with the Klepper lee-boards.
- Safe – can be dismantled and stowed 'on the fly'.

	Sail with Lee-boards & Kwik adapter	Sail with Kwik Adapter	Pacific Action Sail
